

THE CENTER FOR CONNECTION

CONNECT. GROW. THRIVE.

Whole Brain Parenting

For the Exceptional Child

IT ALL STARTS WITH CONNECTION

Relationships and the science of interpersonal neurobiology guide everything that happens at the Center for Connection. Informed by cutting-edge research and intently focused on helping people discover more joy and meaning in their lives through connection with others, the CFC's mission is to help kids and families be happier, healthier, and more fully themselves.

The Center has gathered under one roof expert, independent practitioners from various fields—psychology, social work, pediatrics, educational and occupational therapy, neuropsychology, parent education, nutrition, and on and on—with each clinician offering a connection-based perspective. Families who visit will receive multidisciplinary treatment that is consistent, well informed, relationally based, and always aimed at helping them grow and thrive.

Sloan Walsh

Tuesdays 9:00-10:15

Whole Brain Parenting for the Exceptional Child is a six week class for parents of K-8th grades who need encouragement, support, education and resources for parenting their exceptional child (ADHD/ADD, Autism Spectrum, Gifted, etc.). Parents will have the opportunity to meet weekly with an experienced Parent Education teacher and collaborate with other parents facing the same challenges in raising a child with exceptional needs, gifts and/or circumstances. Discussion topics will include: Parenting Methods for Raising an Exceptional Child, Supporting Learning and Managing School Challenges, Raising Happy Kids Who Thrive and Understanding Ways to Support Your Child's Developing Mind.
